THE PORTABLE SINK
STATIONS

FOR A HAND WASH
ANYWHERE

EVERYDAY STYLE NEW RELEASE 2020

A FLEXIBLE AND ACCESSIBLE SOLUTION FOR ALL

Nothing better than a hand wash with soapy water to comply with hygiene and ensure the safety of our community. Prochef offers a range of portable sink stations to meet all needs and types of applications.

All Prochef sink stations include a 15" x 15" stainless steel sink with rounded corners and an integrated backsplash to prevent water from flowing out of the washing area. They are also equipped with a soap dispenser

and a paper towel dispenser. The stations are entirely constructed of 18 gauge stainless steel. The hinged door on the right has a recessed handle and a keyed cam lock. Mounted on swivel casters of 4" diameter, two of which have brakes, the hand washing stations are easy to move. Proudly designed and manufactured in Canada, portable sink stations come with a one (1) year-limited warranty on parts and labor.

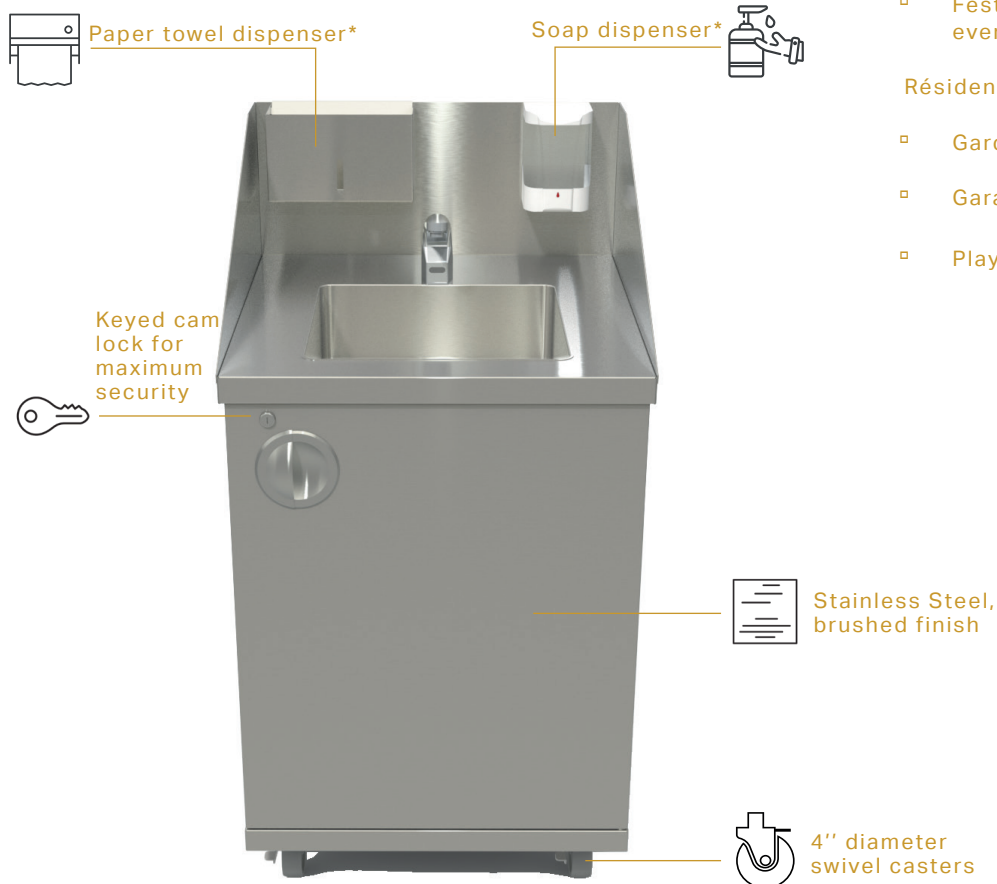

APPLICATIONS:

Commercial

- Hospital and medical clinics
- Food markets
- Construction sites
- Retail center
- School, summer camps and day care
- Restaurants
- Festivals and outdoor events

Résidential

- Garden and terrace
- Garage
- Playroom and training room

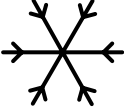

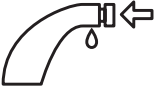

* Paper towel and soap not included

OUR OPTIONS ARE THE KEY TO YOUR SOLUTION

At Prochef, we know that every user has unique needs and specific requirements. We have therefore designed a range of sink stations that will offer a solution adapted to your needs.

Three factors to consider when choosing the right sink station for your needs

 <p>Connected</p> <p>If you have access to a fresh water supply, connected stations are the ideal solution. The connected stations are supplied by a garden hose and the drainage of gray water is done directly in the sewers through a 1 1/2" flexible hose. The major advantage of connected stations is unlimited hand washes.</p>	 <p>Autonomous</p> <p>If a water supply is not accessible, autonomous stations allow efficient hand wash anywhere. A 18 L fresh water tank and a 26 L gray water tank are supplied with the autonomous units. This water supply allows approximately 75 hand washes. Just fill the tank after emptying it, empty the gray water tank and you're ready for a new handwash cycle! Note: the autonomous stations require access to a 120V, 20A electrical outlet.</p>
 <p>Cold water</p> <p>If a power supply is not available to plug the water heater, you have the option of cold water stations. In the connected version, the water temperature is the same as the city water. In the autonomous version, cold water is room temperature since it comes from the tank.</p>	 <p>Hot water</p> <p>For optimal hand wash, a water heater is the ideal solution for ensuring a constant and pleasant water temperature for the user. With an adjustable temperature range directly on the water heater, you can keep it between 50 ° to 140 ° F (10 ° to 60 ° C). Note: stations with hot water require access to a 120V, 20A electrical outlet.</p>
 <p>Metering faucet</p> <p>The metering faucet is activated by pressing a push button and shuts off automatically after the selected duration. It is adjustable between 10 seconds and 1 minute. It is ideal to ensure moderate water use, which is particularly important with an autonomous station.</p>	 <p>Automatic faucet</p> <p>The automatic faucet with motion detector allows contactless activation. Easy to use, it is the most versatile solution for all users, both for children and people with reduced mobility.</p>

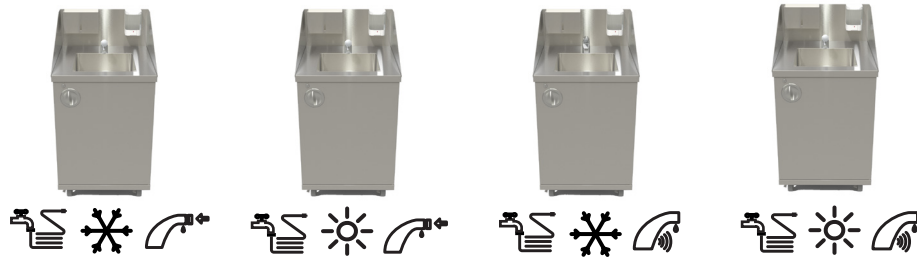

PC-HS24

The connected or autonomous portable sink station are the ideal solution for an efficient hand wash anywhere.

Our series of connected and autonomous stations are available in 4 models with the following options: cold water or hot water, Push button faucet with automatic shut off or motion detector faucet with automatic shut off.

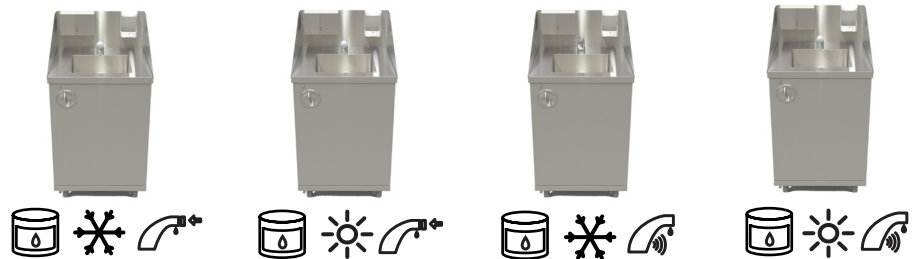

CONNECTED SERIE PC-HS24-C

MODEL	PC-HS24-C-CW-MET	PC-HS24-C-HW-MET	PC-HS24-C-CW-AUTO	PC-HS24-C-HW-AUTO
WATER TEMPERATURE	Cold	Hot	Cold	Hot
FAUCET	Metering	Metering	Automatic	Automatic

AUTONOMOUS SERIE PC-HS24-A

MODEL	PC-H24-A-CW-MET	PC-HS24-A-HW-MET	PC-HS24-A-CW-AUTO	PC-HS24-A-HW-AUTO
WATER TEMPERATURE	Cold	Hot	Cold	Hot
